

Proplay 35mm – Playground Shockpad

ProPlay-35 is designed to protect children against heavy head injuries and is installed under synthetic turf to form an impact absorption surface. ProPlay-35 is supplied as interlocking tile panels and can provide critical fall height protection up to 3.1 metres.

The Technical Stuff

Product Code:
PP35

*Critical Fall Height:
2.1 meter

Application:
Under synthetic turf

Thickness (mm):
37mm

Mass Per Unit Area:
3.3kg/m²

Pad Size:
2.25 x 0.9 = 2.06sqm

Force Reduction:
75%

Vertical Deformation:
13mm

Water Infiltration Rate:
36,000mm/hr

Thermal Conductivity:
0.05 W/m.K

Thermal Resistance:
740 m². K/W

*This product has been tested to requirements of AS/NZS4422:1996 Amdt1and BS1177:2008 NZ5828:2015 refers BS1177:1998 Impact absorbing playground surfacing
